

Botanical Extracts, Essential Oils & Oleoresins

Ingredients your customers will read on the label, from the fields and stills that grow them best.

Aarleez Ltd is a UK-registered importer and business-to-business supplier of botanical ingredients from India: standardised herbal extracts, essential and carrier oils, spice oleoresins, natural powders and colours, and dried botanicals, for supplement brands, contract manufacturers, food, beverage, flavour and cosmetic formulators and ingredient distributors. Every consignment is bought direct from ISO and GMP-certified manufacturers in India, assayed by an independent laboratory before dispatch, and released with a batch-specific Certificate of Analysis your QA team can read before anyone talks price.

Aarleez Ltd trading as Aarleez Wellness

Our promise

[How we supply](#)

Who we supply

How an order runs

Seven core lines

The full range

A–Z index

OUR PROMISE

What you are actually buying

An importer that stands between you and the field, takes the customs and testing risk, and hands you the documents rather than a summary of them. The ingredient list on your pack is our promise too.

Direct from source

We buy from the manufacturer, not from a trader who bought from a trader. Fewer hands means a cleaner price and a document trail that actually reaches the field.

Tested before shipment, not after arrival

Material is assayed at origin and does not travel if it will not pass. We would rather find out in India than at a UK port.

The right assay method

Much of the market is standardised by gravimetry or UV, which read anything that behaves like the marker. Where the specification calls for it, our certificates carry HPLC results with the method named beside every figure.

Importer of record

We clear GB import controls and quote delivered duty paid, so customs exposure sits with us rather than appearing on your desk as a surprise.

Paperwork in your format

Supplier approval questionnaires, quality agreements and self-audit documentation completed as a matter of course.

Any botanical, to specification

Seven lines are shown in depth; any standardised extract, oleoresin or essential oil produced in India can be sourced against your CoA. Send us the incumbent certificate and we will say plainly whether we can match it, better it, or not touch it.

WHO WE SUPPLY

Built around the way you sell

Every buyer is selling something to someone. We supply the ingredient, the certificate and the confidence that lets you make your promise on the pack.

Supplement brands

Standardised actives your formulator can dose precisely, with the assay method on the certificate so your label claim stands up.

Contract manufacturers

Consistent specifications, supplier questionnaires completed in your format, and a partner who is never the weak link when your client's auditor arrives.

Food and beverage

Water-dispersible extracts, oleoresins and natural colours that behave in the line, with allergen and GB labelling declarations ready.

Cosmetic formulators

Cold-pressed oils, essential oils with GC-MS, and cosmetic-grade botanicals with the documentation an assessor expects.

Distributors

A single importer of record for the whole Indian range, quoting delivered duty paid so your margin is not eaten by surprises.

HOW AN ORDER RUNS

From your specification to your loading bay

Six steps, most of them ours. You send a specification; we come back with a certificate and a delivered price, and the goods arrive tested, cleared and documented.

Seven core lines, in depth

The extracts UK buyers ask us for most, shown with the grades we supply and how they are specified. The full range on the following pages covers everything else; every line ships to your specification with a batch certificate.

Ashwagandha extract

Withania somnifera · Root only

5% WITHANOLIDES · HPLC

Root-only extract from Indian-grown ashwagandha. Leaf material is far richer in withaferin A and far cheaper to produce, so blending leaf into a nominally root extract lifts the headline number at a fraction of the cost. We buy root only and the certificate states the plant part. HPLC is the only withanolide figure worth writing on a specification.

SPECIFICATION	Moisture below 5%. Particle size 80 mesh. Heavy metals, microbiology and pesticide residue screened on every batch.	
PACKING	25 kg fibre drums, double food-grade liner; 5 kg foil-laminate pouches for pilot batches and stability work.	
APPLICATIONS	Capsules and tablets, sleep and stress stacks, powdered blends, functional beverage, sports nutrition, traditional-ratio formats.	
SPECIFICATION	ASSAY	PLANT PART
5% withanolides	HPLC	Root
2.5% withanolides	HPLC	Root
10% withanolides	HPLC	Root
Full-spectrum 10:1	Ratio extract	Root
Root powder, milled	Identity & purity	Root

Curcumin 95%

Curcuma longa · Rhizome

95% CURCUMINOIDS · HPLC

The isolated active behind most joint, liver and inflammation-positioned formulations sold in the UK. Buyers often ask for curcumin and mean turmeric extract, or the reverse: curcumin is the isolated active, turmeric extract is the whole rhizome concentrated to a ratio. We supply both and will tell you plainly which your formulation needs.

SPECIFICATION	95% total curcuminoids by HPLC. Moisture below 5%. Residual solvent, heavy metals, microbiology and pesticide residue on every certificate.	
PACKING	25 kg fibre drums, double liner, light-protected in outer cartons on a wrapped pallet; curcumin is photosensitive and stains.	
APPLICATIONS	Joint and inflammation supplements, liver formulas, sports recovery, functional food and beverage, natural colour.	
SPECIFICATION	ASSAY	CURCUMINOIDS
Curcumin 95%	HPLC	95%
Curcumin 10% water-dispersible	HPLC	10%
Turmeric powder, milled	Identity & purity	Naturally occurring

Turmeric extract 10:1

Curcuma longa · Rhizome · Full spectrum

10:1 RATIO · CURCUMINOIDS BY HPLC

The whole rhizome concentrated ten-fold rather than a single molecule isolated out of it, for formulations sold on tradition, full spectrum or a clean-label declaration. The actual curcuminoid content is measured by HPLC and reported on each batch, so you know what you are dosing rather than assuming.

SPECIFICATION	10:1 ratio with curcuminoid assay reported per batch. Moisture below 5%. Heavy metals, microbiology and pesticide residue screened.
PACKING	25 kg fibre drums, double food-grade liner, light-protected, in outer cartons on a wrapped pallet.
APPLICATIONS	Whole-plant supplement formats, ayurvedic and traditional ranges, golden-milk and functional beverage blends, seasoning, natural colour.

SPECIFICATION	FORM	TYPICAL CURCUMINOIDS
Turmeric extract 10:1	Ratio extract	5–10%
Turmeric extract 4:1	Ratio extract	2–4%
Turmeric powder, milled	Milled rhizome	Naturally occurring

Moringa leaf powder and extract

Moringa oleifera · Shade-dried leaf

80 MESH LEAF · 10:1 EXTRACT

Shade-dried leaf only, no stem or stalk, milled fine and screened. Sold on nutrient density rather than a single marker. Most UK buyers take the milled leaf; the 10:1 extract exists for capsule formats where dose volume is the constraint, and a steam-sterilised grade is available for supplements with tight microbiological limits.

SPECIFICATION	Moisture below 8%. Microbiology, heavy metals and pesticide residue reported per batch. Steam sterilisation available.
PACKING	25 kg drums or 20 kg double-lined food-grade PP bags. Bulky and light, so transport is quoted honestly on volume.
APPLICATIONS	Greens and superfood blends, capsules and tablets, functional beverage, bars and snacks, pet nutrition.

SPECIFICATION	FORM	PARTICLE SIZE
Moringa leaf powder	Shade-dried milled leaf	80 mesh
Leaf powder, steam sterilised	Milled leaf	80 mesh
Moringa extract 10:1	Ratio extract	Fine powder
Moringa seed / oil	Seed	—

Ginger extract

Zingiber officinale · Rhizome

5% GINGEROLS · HPLC

The digestive and nausea-positioned active, and an increasingly common warming note in functional beverage. Solubility is usually the deciding factor rather than the assay: dry-blend and capsule applications take the standard oil-soluble grade, while beverages, shots and gummies need the water-dispersible material.

SPECIFICATION	5% total gingerols by HPLC. Moisture below 5%. Residual solvent, heavy metals, microbiology and pesticide residue reported per batch.
PACKING	25 kg fibre drums, double food-grade liner, or 5 kg foil pouches for pilot and stability work.
APPLICATIONS	Digestive and travel-sickness formats, joint and warming blends, functional shots and beverage, sports nutrition, seasoning systems.

SPECIFICATION	ASSAY	SOLUBILITY
Ginger extract 5% gingerols	HPLC	Oil / alcohol soluble
Ginger extract 10% gingerols	HPLC	Oil / alcohol soluble
Water-soluble ginger extract	HPLC	Water dispersible
Ginger powder, milled	Identity & purity	—

Fenugreek extract

50% SAPONINS

Trigonella foenum-graecum · Seed

Seed extract standardised to 50% saponins, the market-standard grade behind most testosterone-support, lactation-support and blood-sugar-positioned formulations in the UK. The higher-saponin and 4-hydroxyisoleucine grades exist for specific formats rather than as upgrades.

SPECIFICATION	50% saponins measured per batch. Moisture below 5%. Heavy metals, microbiology, pesticide residue and residual solvent reported.
PACKING	25 kg fibre drums, double liner, in a sealed outer because of the aroma; segregated storage recommended.
APPLICATIONS	Sports and testosterone-support formats, lactation-support products, blood-sugar supplements, traditional seed-powder blends.

SPECIFICATION	ASSAY	PLANT PART
Fenugreek 50% saponins	Gravimetric / UV	Seed
Fenugreek 60% saponins	Gravimetric / UV	Seed
4-hydroxyisoleucine grade	HPLC	Seed
Fenugreek seed powder	Identity & purity	Seed

Amla extract

40% TANNINS

Emblica officinalis · Fruit

Indian gooseberry, the most-used single fruit in ayurvedic formulation and the backbone of hair, skin and antioxidant-positioned ranges. We standardise on tannins, which are stable and measurable, rather than on vitamin C, which degrades in processing and is routinely overstated. A spray-dried whole-fruit powder is available where a whole-fruit declaration matters more than a marker.

SPECIFICATION	40% tannins measured per batch. Moisture below 5%. Heavy metals, microbiology and pesticide residue reported on the certificate.
PACKING	25 kg fibre drums, double food-grade liner, sealed; amla extract is hygroscopic.
APPLICATIONS	Hair, skin and nail formats, antioxidant and immune supplements, ayurvedic and traditional ranges, functional food and beverage.

SPECIFICATION	ASSAY	FORM
Amla extract 40% tannins	Gravimetric / UV	Concentrated extract
Amla extract 30% tannins	Gravimetric / UV	Concentrated extract
Amla fruit powder, spray dried	Identity & purity	Whole-fruit powder
Triphala blend	Identity & purity	Milled blend

THE FULL RANGE

The full range, organised the way buyers search

Extracts, oils, oleoresins, powders, colours and dried botanicals, sourced from the region that grows each one best, plus functional mushrooms and the non-Indian botanicals a complete formulation needs. If a line is not on these pages, send the specification and we will tell you plainly whether we can hold it. An A–Z index closes the document.

STANDARDISED HERBAL EXTRACTS

Adaptogens, stress, sleep and cognition 12 LINES

Standardised to a marker compound by the method named on the certificate. HPLC where the marker allows it; gravimetric or UV where that is the industry convention, stated as such.

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Ashwagandha	<i>Withania somnifera</i> · root	2.5%, 5%, 10% withanolides (HPLC); 10:1	Stress, sleep, sports
Bacopa (Brahmi)	<i>Bacopa monnieri</i> · whole herb	20%, 40%, 50% bacosides	Cognition, nootropic
Gotu kola	<i>Centella asiatica</i> · aerial	10%, 20%, 40% asiaticosides	Cognition, skin, circulation
Tulsi (holy basil)	<i>Ocimum sanctum</i> · leaf	2.5% ursolic acid; 10:1	Stress, immunity, respiratory
Shatavari	<i>Asparagus racemosus</i> · root	20%, 40% saponins	Women's health, hormonal balance
Shilajit	<i>Purified resin</i>	20%, 50% fulvic acid; resin and powder	Energy, sports, men's health
Mucuna	<i>Mucuna pruriens</i> · seed	15%, 20%, 40% L-dopa (HPLC)	Mood, dopamine support, sports
Saffron extract	<i>Crocus sativus</i> · stigma	2% safranal; 3% crocin; standardised to ISO 3632	Mood, sleep, premium wellness
Valerian (Indian)	<i>Valeriana jatamansi</i> · root	0.8% valerenic acids; 4:1	Sleep, relaxation
Chamomile	<i>Matricaria chamomilla</i> · flower	1.2% apigenin; 4:1	Sleep, calm, beauty
Jatamansi	<i>Nardostachys jatamansi</i> · rhizome	10:1; cultivated source only	Sleep, ayurvedic calm
Licorice	<i>Glycyrrhiza glabra</i> · root	20%, 25% glycyrrhizin; DGL grade	Adrenal, digestive, respiratory

STANDARDISED HERBAL EXTRACTS

Immunity, liver and digestion 14 LINES

The immune, liver and gut actives that UK brands reformulate around every winter. Berberine and milk thistle are the two fastest-growing lines in this group.

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Berberine	<i>Berberis aristata</i> · root and bark	97% berberine HCl (HPLC); 85% grade	Blood sugar, metabolic, gut
Milk thistle	<i>Silybum marianum</i> · seed	70%, 80% silymarin (UV); silybin grades	Liver, detox
Andrographis	<i>Andrographis paniculata</i> · leaf	10%, 20%, 30% andrographolides	Immunity, cold and flu
Guduchi (Giloy)	<i>Tinospora cordifolia</i> · stem	3%, 5% bitters; 10:1	Immunity, ayurvedic
Amla	<i>Emblica officinalis</i> · fruit	30%, 40% tannins; spray-dried fruit powder	Immunity, hair, antioxidant
Triphala	<i>Amla, haritaki, bibhitaki</i> · fruit	40% tannins; classical 1:1:1 blend	Digestive, gut regularity
Ginger	<i>Zingiber officinale</i> · rhizome	5%, 10% gingerols (HPLC); water-soluble	Digestive, nausea, warming
Black pepper	<i>Piper nigrum</i> · fruit	95% piperine (HPLC)	Bioavailability enhancer
Black seed (Kalonji)	<i>Nigella sativa</i> · seed	2%, 5% thymoquinone; cold-pressed oil	Immunity, respiratory
Neem	<i>Azadirachta indica</i> · leaf	5%, 10% bitters; 10:1	Skin, immunity, oral care
Kutki	<i>Picrorhiza kurroa</i> · root	4%, 10% kutkin	Liver, ayurvedic
Senna	<i>Cassia angustifolia</i> · leaf and pod	10%, 20% sennosides	Laxative
Psyllium	<i>Plantago ovata</i> · husk	95%, 98%, 99% purity; 40, 60, 80 mesh	Fibre, gut health
Boswellia	<i>Boswellia serrata</i> · gum resin	65% boswellic acids; 30% AKBA grades	Joint, gut, respiratory

STANDARDISED HERBAL EXTRACTS

Metabolic, joint, sports and men's health 15 LINES

The high-volume actives behind most UK finished products. Most are held at several strengths; the grade a buyer needs usually follows from the dose per capsule.

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Curcumin	<i>Curcuma longa</i> · rhizome	95% curcuminoids (HPLC); 10% water-dispersible	Joint, inflammation, liver

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Turmeric	<i>Curcuma longa</i> · rhizome	10:1, 4:1 full spectrum	Traditional, golden milk
Fenugreek	<i>Trigonella foenum-graecum</i> · seed	50%, 60% saponins; 4-hydroxyisoleucine	Testosterone, lactation, glucose
Gymnema	<i>Gymnema sylvestre</i> · leaf	25%, 50%, 75% gymnemic acids	Blood sugar, sugar cravings
Garcinia	<i>Garcinia cambogia</i> · fruit rind	50%, 60% HCA; calcium and potassium salts	Weight management
Green tea	<i>Camellia sinensis</i> · leaf	50%, 90%, 98% polyphenols; 45%, 50% EGCG	Antioxidant, metabolism
Green coffee	<i>Coffea arabica and robusta</i> · bean	45%, 50% chlorogenic acids	Weight management
Coleus	<i>Coleus forskohlii</i> · root	10%, 20%, 40% forskolin	Weight, respiratory
Bitter melon	<i>Momordica charantia</i> · fruit	1%, 10% charantin; 10:1	Blood sugar
Cinnamon	<i>Cinnamomum</i> · bark	10:1; 5%, 10% polyphenols; low-coumarin grades	Blood sugar, warming
Cissus	<i>Cissus quadrangularis</i> · stem	2.5%, 5%, 20% ketosteroids	Joint, bone, sports
Tribulus	<i>Tribulus terrestris</i> · fruit and aerial	40%, 60%, 90% saponins	Sports, men's health
Safed musli	<i>Chlorophytum borivilianum</i> · root	20%, 40% saponins	Vitality, men's health
Guggul	<i>Commiphora mukul</i> · gum resin	2.5%, 10% guggulsterones	Cholesterol, joint
Moringa	<i>Moringa oleifera</i> · leaf	Leaf powder 80 mesh; 10:1 extract	Greens, nutrient density

STANDARDISED HERBAL EXTRACTS

Beauty, skin, eye and antioxidant 11 LINES

Inside-out beauty and antioxidant actives, plus the cosmetic-grade materials skincare formulators ask for.

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Sea buckthorn	<i>Hippophae rhamnoides</i> · berry and seed	Carotenoids and flavonoids; omega-7 oil	Skin, gut, antioxidant
Pomegranate	<i>Punica granatum</i> · fruit and peel	40% ellagic acid; 30% punicalagins	Antioxidant, cardiovascular
Grape seed	<i>Vitis vinifera</i> · seed	95% proanthocyanidins (OPC)	Antioxidant, skin
Marigold (lutein)	<i>Tagetes erecta</i> · flower	5%, 10%, 20% lutein; zeaxanthin	Eye health
Tomato (lycopene)	<i>Solanum lycopersicum</i> · fruit	5%, 10% lycopene oleoresin and beadlets	Antioxidant, prostate, skin
Bakuchiol	<i>Psoralea corylifolia</i> · seed	98% bakuchiol	Cosmetic, retinol alternative
Sesame (sesamin)	<i>Sesamum indicum</i> · seed	10%, 30%, 90% sesamin	Liver, antioxidant
Hibiscus	<i>Hibiscus sabdariffa</i> · calyx	Anthocyanins; 10:1	Beauty, beverage, blood pressure
Bhringraj	<i>Eclipta alba</i> · whole herb	10:1; 5% wedelolactone	Hair and scalp
Manjistha	<i>Rubia cordifolia</i> · root	10:1	Skin clarity, ayurvedic
Gotu kola (cosmetic grade)	<i>Centella asiatica</i> · aerial	Titrated triterpenes; madecassoside	Skincare, wound care

STANDARDISED HERBAL EXTRACTS

Ayurvedic classics 6 LINES

Lower-volume botanicals that ayurvedic and traditional-format brands still need, held to identity and purity with a ratio or marker where one exists.

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Arjuna	<i>Terminalia arjuna</i> · bark	20%, 40% tannins	Cardiovascular
Haritaki / Bibhitaki	<i>Terminalia chebula</i> / <i>bellirica</i> · fruit	40% tannins; 10:1	Digestive, ayurvedic
Punarnava	<i>Boerhavia diffusa</i> · root	10:1; 4:1	Kidney, fluid balance
Vidanga, Pippali, Trikatu	<i>Embelia</i> , <i>Piper longum</i> , <i>classical blend</i>	Identity; piperine on trikatu	Digestive fire, classical formulas
Ashoka, Lodhra	<i>Saraca asoca</i> bark, <i>Symplocos</i> bark	10:1	Women's health, classical
Yashtimadhu, Musta, Vacha	<i>Licorice</i> , <i>Cyperus</i> , <i>Acorus</i>	Identity and purity; 4:1	Classical formulas

FUNCTIONAL MUSHROOM EXTRACTS

Fruiting-body extracts, specified properly 6 LINES

Sold as extracts, not mushroom powder: fruiting body declared, beta-glucan content measured by the Megazyme method, species confirmed by DNA or HPTLC, and heavy metals, microbiology and pesticide residue on every certificate. Hot-water and dual (water and ethanol) extractions available.

MUSHROOM	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Lion's mane	<i>Hericium erinaceus</i> · fruiting body	30% beta-glucans; 8:1 dual extract; hericenones reported	Cognition, focus, nerve support

MUSHROOM	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Reishi	<i>Ganoderma lucidum</i> · fruiting body	30% beta-glucans; 4% triterpenes; dual extract	Immunity, calm, sleep
Cordyceps militaris	<i>Cordyceps militaris</i> · fruiting body	30% beta-glucans; 0.3%, 1% cordycepin	Energy, sports, endurance
Turkey tail	<i>Trametes versicolor</i> · fruiting body	40% beta-glucans; PSK and PSP reported	Immunity, gut
Shiitake	<i>Lentinula edodes</i> · fruiting body	30% beta-glucans; lentinan reported	Immunity, food
Oyster	<i>Pleurotus ostreatus</i> · fruiting body	30% beta-glucans	Immunity, food

THROUGH OUR PARTNER MANUFACTURERS

Botanicals not grown in India, supplied to the same standard 12 LINES

These are grown elsewhere and reach us through the same GMP-certified manufacturing partners, with the same batch certificate and testing pack. Origin is stated on every document. Listed so a buyer can consolidate a full formulation with one supplier.

BOTANICAL	LATIN NAME · PART	STANDARD GRADES	TYPICAL POSITIONING
Rhodiola	<i>Rhodiola rosea</i> · root	3% rosavins, 1% salidroside (HPLC)	Adaptogen, sports, fatigue
Ginkgo	<i>Ginkgo biloba</i> · leaf	24% flavone glycosides, 6% terpene lactones	Cognition, circulation
Echinacea	<i>Echinacea purpurea</i> · aerial and root	4% phenolics; alkylamides reported	Immunity
Elderberry	<i>Sambucus nigra</i> · berry	5%, 15% anthocyanins; 10:1	Immunity, beverage, gummies
Astragalus	<i>Astragalus membranaceus</i> · root	0.5% astragalosides; 70% polysaccharides	Immunity, adaptogen
Passionflower	<i>Passiflora incarnata</i> · aerial	3.5% flavonoids; 4:1	Relaxation, sleep
Valerian (European)	<i>Valeriana officinalis</i> · root	0.8% valerenic acids	Sleep
Artichoke	<i>Cynara scolymus</i> · leaf	5% cynarin; 15% chlorogenic acids	Digestive, liver, cholesterol
Dandelion	<i>Taraxacum officinale</i> · root and leaf	4:1; inulin reported	Digestive, liver, fluid balance
Chaga	<i>Inonotus obliquus</i> · sclerotium	30% beta-glucans; 8:1 dual extract	Antioxidant, immunity
Maitake	<i>Grifola frondosa</i> · fruiting body	30% beta-glucans; D-fraction reported	Immunity, metabolic
Tremella	<i>Tremella fuciformis</i> · fruiting body	30% polysaccharides	Beauty, hydration

ESSENTIAL OILS

Steam-distilled, cold-pressed and CO2 oils 24 LINES

Supplied with GC-MS profile per lot, with the chemotype named. Bulk in aluminium or epoxy-lined drums; food-grade and cosmetic-grade documentation on request.

OIL	LATIN NAME · PART	GRADE AND KEY CONSTITUENTS	TYPICAL USE
Peppermint	<i>Mentha piperita</i> · leaf	Menthol 35–45%; rectified and natural	Flavour, oral care, aromatherapy
Cornmint and menthol crystals	<i>Mentha arvensis</i> · leaf	Dementholised oil; menthol crystals USP/BP	Flavour, pharma, confectionery
Spearmint	<i>Mentha spicata</i> · leaf	Carvone 55–65%	Flavour, oral care
Lemongrass	<i>Cymbopogon flexuosus</i> · leaf	Citral 75–85%	Flavour, fragrance, cleaning
Citronella	<i>Cymbopogon winterianus</i> · leaf	Citronellal 32–45%	Fragrance, insect repellent
Palmarosa	<i>Cymbopogon martinii</i> · leaf	Geraniol 75–85%	Fragrance, cosmetic
Eucalyptus	<i>Eucalyptus globulus</i> · leaf	Cineole 70–85%	Pharma, respiratory, cleaning
Basil (sweet)	<i>Ocimum basilicum</i> · leaf	Methyl chavicol and linalool chemotypes	Flavour, fragrance
Tulsi	<i>Ocimum sanctum</i> · leaf	Eugenol type	Wellness, aromatherapy
Ginger	<i>Zingiber officinale</i> · rhizome	Steam-distilled and CO2; zingiberene	Flavour, beverage, pharma
Turmeric	<i>Curcuma longa</i> · rhizome	Turmerone 40–60%	Wellness, cosmetic
Black pepper	<i>Piper nigrum</i> · fruit	Caryophyllene, limonene; CO2 grade	Flavour, fragrance
Cardamom	<i>Elettaria cardamomum</i> · seed	Cineole and terpinyl acetate	Flavour, fragrance
Clove	<i>Syzygium aromaticum</i> · bud and leaf	Eugenol 80–90%	Pharma, dental, flavour
Cinnamon	<i>Cinnamomum</i> · bark and leaf	Bark: cinnamaldehyde; leaf: eugenol	Flavour, fragrance
Nutmeg	<i>Myristica fragrans</i> · seed	Sabinene, myristicin within limits	Flavour, fragrance
Cumin, coriander, fennel, dill, celery, ajowan	Seed oils	Cuminaldehyde, linalool, anethole, carvone, thymol	Flavour, pharma

OIL	LATIN NAME · PART	GRADE AND KEY CONSTITUENTS	TYPICAL USE
Vetiver	<i>Chrysopogon zizanioides</i> · root	Khusimol; North and South Indian types	Fine fragrance
Sandalwood	<i>Santalum album</i> · heartwood	Santalols 70%+; government-auctioned wood	Fine fragrance, attar
Jasmine absolute	<i>Jasminum grandiflorum</i> and <i>sambac</i> · flower	Solvent-extracted absolute	Fine fragrance
Rose	<i>Rosa damascena</i> · flower	Otto and absolute; Kannauj distillation	Fine fragrance, attar
Davana, nagarmotha, patchouli	<i>Artemisia pallens</i> , <i>Cyperus scariosus</i> , <i>Pogostemon</i>	Fragrance specialties	Fine fragrance, incense
Frankincense	<i>Boswellia serrata</i> · resin	Steam-distilled; alpha-thujene	Aromatherapy, cosmetic
Citrus	<i>Sweet orange</i> , <i>lemon</i> , <i>lime</i> · peel	Cold-pressed; limonene 90%+	Flavour, cleaning

FIXED AND CARRIER OILS

Cold-pressed seed, nut and specialty oils 12 LINES

Cold-pressed, filtered and packed under nitrogen where the oil oxidises quickly. Refined grades and butters to specification.

OIL	SOURCE	GRADE	TYPICAL USE
Coconut	<i>Cocos nucifera</i> · kernel	Virgin cold-pressed; refined	Food, cosmetic
Sesame	<i>Sesamum indicum</i> · seed	Cold-pressed; refined	Food, ayurvedic, cosmetic
Castor	<i>Ricinus communis</i> · seed	Cold-pressed, BP/USP; first special grade	Cosmetic, pharma, industrial
Neem	<i>Azadirachta indica</i> · seed	Cold-pressed; azadirachtin reported	Agri, cosmetic, pet care
Moringa	<i>Moringa oleifera</i> · seed	Cold-pressed (ben oil)	Cosmetic
Black seed (kalonji)	<i>Nigella sativa</i> · seed	Cold-pressed; thymoquinone reported	Supplement, wellness
Sea buckthorn	<i>Hippophae rhamnoides</i> · seed and pulp	Cold-pressed and CO2; omega-7 reported	Supplement, skincare
Flaxseed	<i>Linum usitatissimum</i> · seed	Cold-pressed; omega-3 reported	Supplement, food
Pumpkin seed	<i>Cucurbita</i> · seed	Cold-pressed	Supplement, food
Groundnut, sunflower, mustard	<i>Seed</i>	Cold-pressed (kachi ghani) and refined	Food, catering
Karanja	<i>Pongamia pinnata</i> · seed	Cold-pressed	Agri, cosmetic
Kokum, sal, mango butters	<i>Garcinia indica</i> , <i>Shorea robusta</i> , <i>Mangifera</i> · kernel	Refined and unrefined butters	Cosmetic, confectionery

OLEORESINS AND SPICE EXTRACTS

Concentrated flavour and colour from Indian spices 14 LINES

Solvent-extracted or CO2 oleoresins with the active or colour value reported per lot. Water-dispersible and oil-soluble forms, and spray-dried encapsulated powders, to specification.

OLEORESIN	SOURCE	STANDARD SPECIFICATION	TYPICAL USE
Paprika	<i>Capsicum annum</i>	Colour value 40,000 to 100,000 CU; low-pungency	Natural colour, meat, snacks
Capsicum	<i>Capsicum frutescens</i> and <i>annuum</i>	1%, 2.5%, 5%, 10% capsaicin; SHU stated	Heat, sauces, pharma topicals
Black pepper	<i>Piper nigrum</i>	40% piperine; volatile oil 15–20%	Seasoning, meat, flavour
Turmeric	<i>Curcuma longa</i>	25%, 35%, 45% curcumin; water-dispersible	Colour, seasoning
Ginger	<i>Zingiber officinale</i>	25%, 30% gingerols; volatile oil 20–30%	Beverage, bakery, confectionery
Cardamom	<i>Elettaria cardamomum</i>	Volatile oil 50–70%	Bakery, beverage, flavour
Cinnamon and cassia	<i>Cinnamomum</i>	Cinnamaldehyde 40–60%	Bakery, beverage
Clove	<i>Syzygium aromaticum</i>	Eugenol 70–85%	Meat, bakery, oral care
Cumin, coriander, fennel, celery, ajowan	<i>Seed</i>	Volatile oil stated per lot	Seasoning blends, snacks
Fenugreek	<i>Trigonella foenum-graecum</i>	Sotolone-rich; deodorised grades	Seasoning, flavour
Nutmeg and mace	<i>Myristica fragrans</i>	Volatile oil stated; myristicin within limits	Meat, bakery
Garlic and onion	<i>Allium</i>	Oleoresin and oil; allicin equivalent stated	Seasoning, snacks
Curry leaf, mustard, tamarind	<i>Various</i>	To specification	Ethnic seasoning, sauces

OLEORESIN	SOURCE	STANDARD SPECIFICATION	TYPICAL USE
Spray-dried spice powders	Any of the above	Encapsulated on maltodextrin or gum arabic	Dry blends, seasonings

NATURAL POWDERS, COLOURS AND FUNCTIONAL INGREDIENTS

Fruit and vegetable powders, botanical powders, colours, gums and sweeteners 10 LINES

Spray-dried, freeze-dried or milled to specification. Colour ingredients carry colour value per lot; gums carry viscosity and mesh.

INGREDIENT	SOURCE	STANDARD GRADES	TYPICAL USE
Fruit powders	Amla, mango, banana, pomegranate, jamun, papaya, guava, lemon	Spray-dried on maltodextrin; freeze-dried 100% fruit	Beverage, bars, nutrition
Vegetable powders	Beetroot, spinach, carrot, tomato, pumpkin, bitter gourd	Spray-dried, drum-dried and milled	Greens blends, food
Grass and greens powders	Wheatgrass, barley grass, moringa, spirulina, curry leaf	Milled; steam-sterilised grades	Greens blends, capsules
Ayurvedic herb powders	Ashwagandha, tulsi, neem, brahmi, shatavari, triphala, arjuna	Milled 60–100 mesh; identity and purity	Traditional formats, churna
Hair and skin botanicals	Henna, indigo, amla, shikakai, reetha, hibiscus, bhringraj	Milled and sifted; microbiology reported	Cosmetic, hair colour
Natural colours	Turmeric (curcumin), paprika, annatto (bixin and norbixin), beetroot red, black carrot and jamun anthocyanin, marigold, chlorophyll, caramel	Colour value or E-number strength per lot; water- and oil-dispersible	Food and beverage colour
Gums and fibres	Guar gum, fenugreek gum, tamarind kernel powder, psyllium husk, isabgol	Viscosity and mesh stated; food and pharma grades	Thickening, fibre
Natural sweeteners	Stevia (RA 60 to 98%), jaggery powder, coconut sugar, date syrup and powder	Purity or sugar profile stated	Sugar reduction, natural sweetening
Plant proteins	Rice, mung bean, chickpea, pea (limited), moringa seed	Protein content stated; 70–80% concentrates	Protein fortification
Resins and gums	Guggul, boswellia, gum arabic (Indian), shellac, gum karaya	Grade per lot	Pharma, food, cosmetic

DRIED BOTANICALS AND TEA CUTS

Whole, cut and sifted herbs for tea, infusion and formulation 6 LINES

Tea-cut (TBC) and whole-leaf grades, with moisture, microbiology and pesticide screening. Steam-sterilised where a brand's micro limits demand it.

BOTANICAL	FORM	NOTES	TYPICAL USE
Tulsi, lemongrass, moringa, hibiscus, rose petals, spearmint	Tea cut and whole leaf	Colour and aroma graded	Herbal tea, infusions
Chamomile, butterfly pea, blue lotus, marigold petals	Whole flower and petal	Colour retention graded	Tea, cosmetic, botanicals
Ginger, turmeric, amla, licorice, cinnamon	Slices, flakes, chips and tea cut	Moisture controlled	Tea, cooking, formulation
Ashwagandha, shatavari, brahmi, arjuna, giloy	Root, bark and stem cuts	Identity verified	Traditional, decoction
Stevia leaf, senna leaf, neem leaf	Dried leaf and tea cut	Active reported where relevant	Tea, herbal, pharma
Dried mushrooms	Shiitake, oyster, lion's mane slices	Moisture below 10%	Food, broth, tea

Find what you are looking for

A

Amla	Immunity, liver and digestion
Amla extract	Core lines
Andrographis	Immunity, liver and digestion
Arjuna	Ayurvedic classics
Artichoke	Through our partner manufacturers
Ashoka	Ayurvedic classics
Ashwagandha	Adaptogens, stress, sleep and cognition
Ashwagandha extract	Core lines
Astragalus	Through our partner manufacturers
Ayurvedic herb powders	Natural powders, colours and functional ingredients

B

Bacopa (Brahmi)	Adaptogens, stress, sleep and cognition
Bakuchiol	Beauty, skin, eye and antioxidant
Basil (sweet)	Essential oils
Berberine	Immunity, liver and digestion
Bhringraj	Beauty, skin, eye and antioxidant
Bitter melon	Metabolic, joint, sports and men's health
Black pepper	Immunity, liver and digestion
Black seed (Kalonji)	Immunity, liver and digestion
Boswellia	Immunity, liver and digestion

C

Capsicum	Concentrated flavour and colour from Indian spices
Cardamom	Essential oils

Eucalyptus	Essential oils

F

Fenugreek	Metabolic, joint, sports and men's health
Fenugreek extract	Core lines
Flaxseed	Fixed and carrier oils
Frankincense	Essential oils
Fruit powders	Natural powders, colours and functional ingredients

G

Garcinia	Metabolic, joint, sports and men's health
Garlic and onion	Concentrated flavour and colour from Indian spices
Ginger	Immunity, liver and digestion
Ginger extract	Core lines
Ginkgo	Through our partner manufacturers
Gotu kola	Adaptogens, stress, sleep and cognition
Gotu kola (cosmetic grade)	Beauty, skin, eye and antioxidant
Grape seed	Beauty, skin, eye and antioxidant
Grass and greens powders	Natural powders, colours and functional ingredients
Green coffee	Metabolic, joint, sports and men's health
Green tea	Metabolic, joint, sports and men's health
Groundnut	Fixed and carrier oils
Guduchi (Giloy)	Immunity, liver and digestion
Guggul	Metabolic, joint, sports and men's health

Gums and fibres	Natural powders, colours and functional ingredients
Gymnema	Metabolic, joint, sports and men's health

H

Hair and skin botanicals	Natural powders, colours and functional ingredients
Haritaki	Ayurvedic classics
Hibiscus	Beauty, skin, eye and antioxidant

J

Jasmine absolute	Essential oils
Jatamansi	Adaptogens, stress, sleep and cognition

K

Karanja	Fixed and carrier oils
Kokum	Fixed and carrier oils
Kutki	Immunity, liver and digestion

L

Lemongrass	Essential oils
Licorice	Adaptogens, stress, sleep and cognition
Lion's mane	Fruiting-body extracts, specified properly
Lodhra	Ayurvedic classics

M

Maitake	Through our partner manufacturers
Manjistha	Beauty, skin, eye and antioxidant
Marigold (lutein)	Beauty, skin, eye and antioxidant
Milk thistle	Immunity, liver and digestion
Moringa	Metabolic, joint, sports and men's health
Moringa leaf powder and extract	Core lines
Mucuna	Adaptogens, stress, sleep and cognition
Musta	Ayurvedic classics

N

Natural colours	Natural powders, colours and functional ingredients
Natural sweeteners	Natural powders, colours and functional ingredients
Neem	Immunity, liver and digestion
Nutmeg	Essential oils
Nutmeg and mace	Concentrated flavour and colour from Indian spices

O

Oyster	Fruiting-body extracts, specified properly
--------	--

P

Palmarosa	Essential oils
Paprika	Concentrated flavour and colour from Indian spices
Passionflower	Through our partner manufacturers

Peppermint	Essential oils
Pippali	Ayurvedic classics
Plant proteins	Natural powders, colours and functional ingredients
Pomegranate	Beauty, skin, eye and antioxidant
Psyllium	Immunity, liver and digestion
Pumpkin seed	Fixed and carrier oils
Punarnava	Ayurvedic classics

R

Reishi	Fruiting-body extracts, specified properly
Resins and gums	Natural powders, colours and functional ingredients
Rhodiola	Through our partner manufacturers
Rose	Essential oils

S

Safed musli	Metabolic, joint, sports and men's health
Saffron extract	Adaptogens, stress, sleep and cognition

Sandalwood	Essential oils
Sea buckthorn	Beauty, skin, eye and antioxidant
Senna	Immunity, liver and digestion
Sesame	Fixed and carrier oils
Sesame (sesamin)	Beauty, skin, eye and antioxidant

Everything we ship ends up in something a person will pick up, read the back of, and trust. *We buy, test and document as if our own name were on that pack.*

QUALITY AND DOCUMENTATION

Five checks between the field and your door

1

Supplier vetting
ISO and GMP-certified manufacturers, audited on documentation, facility standards and consistency of supply.

2

Pre-shipment verification
The batch you approve is the batch that ships. Each lot is checked against the specification you signed off before dispatch.

3

Independent testing
Third-party assay by the stated method, plus heavy metals, microbiology, pesticide residue and residual solvent, at origin.

4

Import clearance
Customs entry, duty and GB import controls handled by Aarleez Ltd as importer of record.

5

Release with the full pack
CoA, assay report, packing list and certificate of origin. Batch codes trace to the source lot, and a reference portion of every lot is retained for later verification.

CHECK	WHAT IT COVERS
Marker assay	HPLC where the specification calls for it: withanolides, curcuminoids, gingerols. Saponins and tannins by the stated method.
Heavy metals	Lead, cadmium, mercury and arsenic. Concentrated extracts concentrate soil contaminants along with the actives, so this matters more on a 10:1 than on the raw herb.
Microbiology	Total plate count, yeast and mould, E. coli, Salmonella.
Pesticide residue	Multi-residue screening against retained EU maximum residue levels.
Residual solvents	Within pharmacopoeial limits for the extraction method used.
Allergen controls	Segregated handling, with declarations prepared for GB labelling.

Documents with every consignment

Lot-tied Certificate of Analysis, heavy-metals and microbiology reports, pesticide-residue screen, packing list, commercial invoice and certificate of origin.

On request

Allergen, GMO, vegan, halal and BSE/TSE statements; organic certification on selected lines; phytosanitary certification; EORI details for your own customs records; supplier questionnaires and quality agreements completed in your format.

HOW WE SUPPLY

Terms that hold

Every order ships made-to-order from tested lots in India, which is why every delivery carries a batch-specific certificate rather than a generic one.

MINIMUM ORDER

25 kg per specification, one standard fibre drum. Mixed consignments across two or more extracts accepted on a first order.

LEAD TIME

Typically 1–2 weeks from order confirmation to a UK address for finished, tested lots. Bespoke specifications needing a fresh production run take longer, and we give the honest date at quotation.

PRICING

Quoted delivered duty paid to your address in GBP, so the price you accept is the price you pay. Ex-warehouse collection available. Prices are not published because crop markets move; quotations within 24 hours.

SPECIFICATION MATCHING

Send the incumbent Certificate of Analysis, supplier name redacted if you prefer. We will say whether we can match it, better it, or not touch it, rather than promise a specification we cannot hold.

PRIVATE LABEL AND PACKING

Retail-ready, private-label and pilot-scale packing to specification, with your artwork and GB labelling declarations prepared.

DOCUMENTATION

Supplier questionnaires, quality agreements and self-audit documentation completed in your format.

NEXT STEP

Send us a specification, get a delivered price

Tell us the active, the percentage and the format you are formulating in. We will come back with a batch certificate for the line and a delivered price within 24 hours.
